ENVIRONMENTAL POLICY

Golar is committed to minimise the environmental footprint. LNG is the most environmentally friendly fossil fuel and we strive to produce it with minimum negative environmental impact. We believe that LNG has an important role to play in a transition period to a Carbon neutral and sustainable future.

We shall:

- ✓ Endeavour to minimise our environmental footprint at each stage of our value chain from business development, project execution and through to operations
- ✓ Minimise our emissions to air
- ✓ Aim for zero spills
- ✓ Understand all environmental aspects of our business
- ✓ Measure and report our environmental impact
- ✓ Review our environmental KPIs regularly
- ✓ Set new and stricter environmental goals regularly
- ✓ Always comply with environmental regulations
- ✓ Strive to utilise available and proven technologies to reduce our environmental impact
